

ACME LED MOVE 600PE / LED-MS600PE

By ACME
www.acme.com.cn

The LED Move 600PE series is an innovative moving fixture that is equipped with a 150W LED light source, which can offer 4,000 lux at a distance of 5 metres. Features include: One rotating gobo wheel, one fixed gobo wheel, one colour wheel, rotating prism, motorized focus with DMX control, iris, smooth 0~100% dimming, variable strobe speeds, 16° beam angle, and more.

The voltage specification is AC 100-240V, 50/60Hz, and the available operation modes are DMX, Master/Slave, and Sound Active. The moving light's high brightness and beam effects make the LED Move 600PE suitable for a wide range of entertainment applications such as stage performances, bars, clubs, etc.

PH12 LED OUTDOOR INTELLIGENT CURTAIN

By GUANGZHOU CHARMING LIGHTING Co., LTD
www.charming-lighting.com

The unique PH12 LED Outdoor Intelligent Curtain is fitted with 1,280 pieces of high-brightness 3-in-1 SMD3528 LEDs, offering full colour possibilities, high brightness and high quality effects. It is designed with the PC material metal housing and has an IP65 protection rating. Its maximum power consumption is 100W and input voltage is DC36V. Dimensions are 192 x 96 x 20mm. With a life span of 50,000 hours, the LED Outdoor Intelligent Curtain is an ideal choice for facades, entertainment events, fashion shows, stage performances, etc.

PT320B-R BEAM HEAD LIGHT

By GOLDENSEA PROFESSIONAL EQUIPMENT LIMITED
www.terbly.com

The PT320B-R Beam Head Light uses a Philips Platinum 15R light source, and provides an excellent light output and brightness – making it well suited for bars, discos, concerts, theatres and TV studios. The luminaire provides a colour temperature of 8,000K, DMX512 control capabilities with an integrated wireless receiver, and 14/16/22 channels. The lighting fixture is eligible for software upgrades, and can be used with remote DMX addressing, advanced RDM functions.

Key features include: A motorized focus; Pan 540°/630° optional (16-bit); Tilt 265° (16-bit); colour wheel: 8 dichroic filters + open, rainbow effect; rotating gobo wheel: 8 interchangeable, rotating, indexable, gobos + open; static gobo wheel: 11 indexable gobos + 3 open; rotating prism: 8 facets prism (standard), 5 facets prism (optional) and prism macros; shutter - variable from 1-25 flashes per second or random strobe; 0-100 percent full range dimming, frost: 0-100%; beam angle: 4.8°; 7 pre-built programmes, fast, stable and quiet, auto X-Y repositioning system; and more. The Beam Light comes with a user-friendly touchpad (full colour LCD) display and a rechargeable battery.

PURE SAPPHIRE COMPACT SERIES

By LASERWORLD (ASIA) Co., LTD.
www.laserworld.com / www.laserworld.cn

The versatile Pure Sapphire Compact Series is completely manufactured in Switzerland, and comes with a new and extremely small housing (26 x 26 x 17cm). The lighting system is equipped with high-end SwissLas diode modules and has an optimized beam shape.

The fast Xscan galvos assure great beams for indoor and outdoor applications. The Pure Sapphire Compact Series can be controlled using the ILDA laser control software. All units have trim pots on the rear side of the device to adjust the colour balance and X/Y shifts.
